

QUESTIONS ABOUT DUST CONTROL

Wapello County has an established **dust control policy**. Following are questions we hear often related to this policy.

Q: How do I get dust control by my property?

A: Contact **an approved dust control supplier for Wapello County**. They will provide you with our dust control policy, permit application, and green flags to mark the location to be sprayed. **You do not need to contact Wapello County.**

Q: How much is the permit for dust control?

A: There is no cost for the actual Wapello County Dust Control Permit. All costs for dust control are determined by each individual approved supplier.

Q: Where do I get the green flags to mark my dust control?

A: The green flags are supplied by your dust control provider. You are responsible for keeping the green flags visible so the road grader does not grade your dust control.

Q: Can I use waste oil as dust control?

A: No. Waste oil is a pollutant and not permitted by the Iowa DNR or Wapello County.
